LANGUAGES

Arabic NATIVE
English C1 / B2
German B1.1

CORE SKILLS

C++20 ADAS AUTOSAR
ISO 26262 MISRA
Sensor Fusion Qt 6 GTest
Linux Nix

STRENGTHS

Independent Work. Owns complex tasks end-to-end with minimal oversight.

01 EXPERIENCE

3 ROLES · 6 YRS

APR 2026 -
PRESENT

Part-time Software Developer
MDO Mitteldeutsche Online GmbH · Bitterfeld-Wolfen, Germany

- > API annotation and documentation for YII2 framework applications.
- > Built an AI code reviewer tool and authored performance tests for the project.

JAN 2022 -
MAY 2025

ADAS Developer — External Developer for INTENTA GmbH LIT — Lebanese Information Technology · Akkar, Lebanon

- > Built core features for object tracking and multi-sensor fusion (Camera · Radar · Map) for the VW PPE E³ 1.2 platform.
- > Used ADTF to analyze vehicle behavior, replay .dat files, and fix behavioral anomalies.
- > Wrote Google Test unit tests achieving 90–95% coverage on safety-critical paths.
- > Resolved AUTOSAR, MISRA C and ISO 26262 violations using Axivion static analysis.
- > Profiled and optimized execution paths, reducing latency in safety-critical modules.
- > Delivered features on time within an international Scrum team with minimal supervision.

JAN 2020 -
DEC 2021

Lecturer — Computer Vision & Robotics
Tishreen University · Lattakia, Syria

- > Taught advanced robotics: kinematics and Degrees of Freedom using Raspberry Pi hardware.
- > Taught Computer Vision: OpenCV in Python for image processing and noise reduction.
- > Delivered technical coursework to mixed-level student groups in a university setting.

02 TECH STACK

/USR/LOCAL/BIN

LANGUAGES 10 [C] [C++] [C#] [Python] [Go] [ASP.NET] [Bash] [Nix] [SQL] [MATLAB]

AUTOMOTIVE 06 [ADTF] [AUTOSAR] [MISRA C] [ISO 26262] [UML] [ASPICE]

FRAMEWORKS 05 [Agile/Scrum] [YII2] [HIL Testing] [Automated Testing] [V-Model]

CLOUD & INFRA 06 [Docker] [Kubernetes] [Kafka] [NixOS] [Nix Flakes] [CMake]

TOOLS & IDE 10 [Qt 6] [Git] [GitLab CI/CD] [Visual Studio] [GDB] [Google Test] [Doxygen] [Axivion] [JIRA] [Embedded Linux]

Fast Learning. Picks up new domains quickly, even under deadline pressure.

Teamwork. Clear communication across international, cross-functional teams.

03 PROJECTS

GIT LOG --ONELINE

FEB — MAR 2026

Autonix // C++20 · Qt6 gitlab.com/.../autonix

- \$ Safety-critical ADAS simulation environment in C++20 / Qt6 — built as a test project for AI-assisted development workflows using Claude and Gemini with a spec-kit structure.
- \$ Physics-based ego vehicle control, Adaptive Cruise Control (Eco / Comfort / Sport), NPC traffic AI with rule compliance, and a perception filtering pipeline.
- \$ Layered architecture (Core / Perception / UI as static libraries); state machines for lane change & traffic light; Strategy pattern for ACC mode switching.
